

clover

Clover offers the flexibility that many educational establishments require allowing modules to be configured in several ways using the clever addition of a square or triangular additional segment fitted between the modules. By utilising these pieces, clients can re-configure or combine two, three or four sections to create functional and interesting clusters.

Clover-L-SQ H420 : W1200 : D1200

Clover-L-TR H420 : W1000 : D1000

Clover-SEG H420 : W400 : D480

(shown with optional castors)

Clover-SQ H420 : W420 : D420

Clover-RD H420 : W420 : D420

code

| | |
|-------------|----------------------------------|
| Clover-RD | Round single segment |
| Clover-SQ | Square single segment |
| Clover-SEG | Two clover segments |
| Clover-L-SQ | Square link for 4 segments |
| Clover-L-TR | Triangular link for 3 segments |
| CAS - | Castors (please use suffix code) |
| CAS-LOCK | Castors (please use suffix code) |
